

Box Instructions

Please include the service request form that comes in the box.
Absolutely no fork guards, bleeder screws, or pinch bolts.

The box comes with shock box, two inner end caps, and a service request form. All items will fit without disassembly of boxes.

Place single box end on the bottom of the box with folds facing up. Insert first fork leg with caliper bracket facing toward inside of box.

Place second fork with axle lug facing toward the inside of box.

The arrangement should look like this.

Insert shock into the provided shock box. Then tape the box closed.

Slide shock box between the forks. You may have to squeeze and crease the bottom edge of shock box to get it to fit.

The shock box should slide a few inches below the fork caps as seen above.

Place second box end with folds facing toward forks. Push down until the end is flush with box. Tape the box shut securely.

This package was specifically designed for suspension. No additional packing (i.e. packing peanuts, towels, etc.) is needed.
